ToolManageriQ™

The Fully Integrated Tool Management Solution

Experience the next generation of CNC efficiency with ToolManageriQ™ v4.0—seamlessly integrated with GIBBSCAM

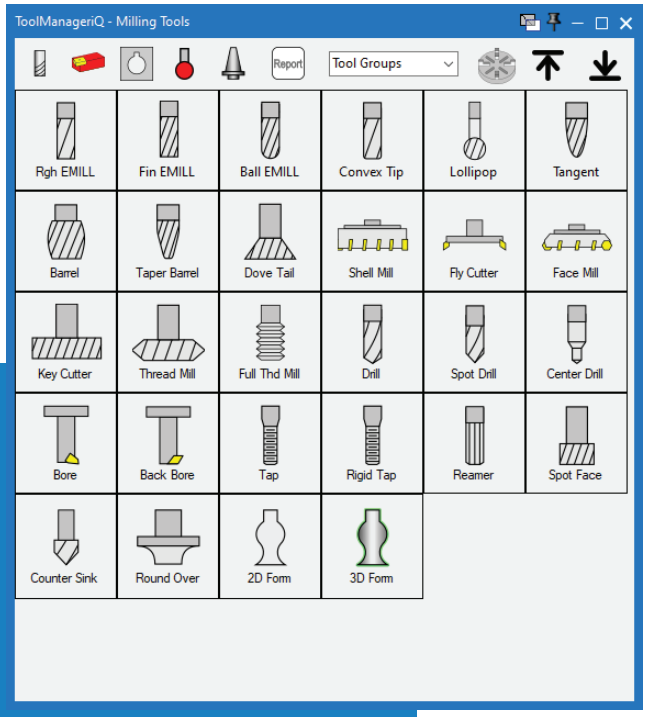
FREE 30 day trial

TMiQ v4.0 Tool Managment for GibbsCAM

Seamlessly Integrated with GibbsCAM 2025

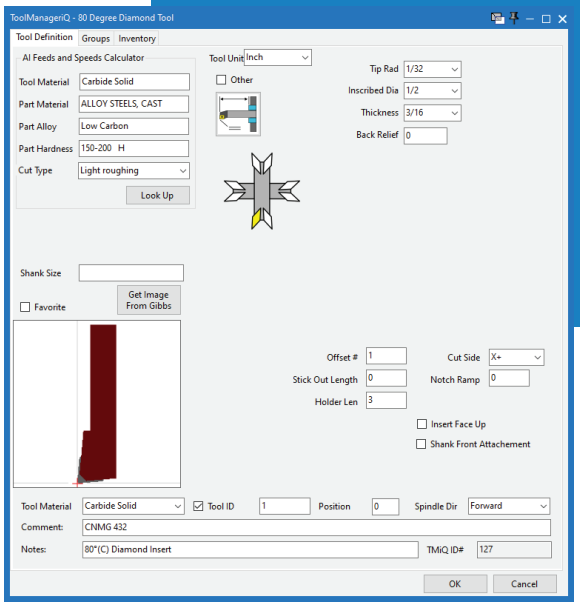
New Integrated Interface

ToolManageriQ™ is designed to fit right into your workflow, maintaining the look and feel of GibbsCAM with familiar palettes, dialogs, and tool icons.



- **Intuitive interface for a smooth user experience**
- **Imperial & Metric support**

- **Fully supports tool holders for both milling and turning operations**



Stay productive without the need for extensive retraining—it's CNC tool management, simplified.

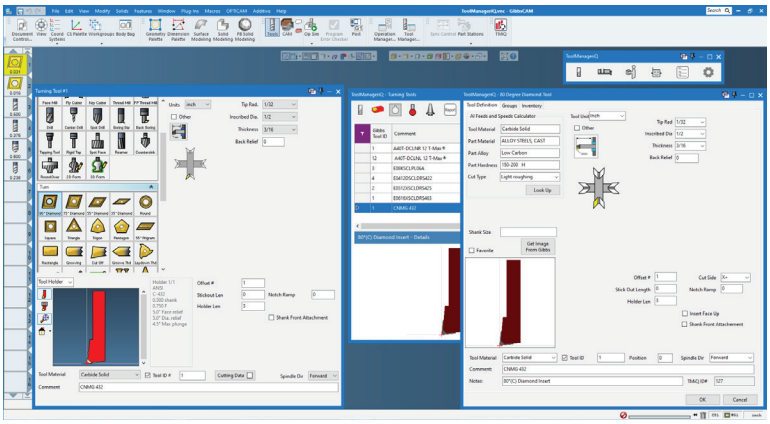
Your Centralized Tool Management Hub

Stay organized, reduce downtime, and improve tool tracking across your entire operation

A common challenge all CNC programmers experience is handling tools, tool holders, and fixture models efficiently when using CAM software.

- The robust SQL database in ToolManageriQ™ organizes everything you need:
- Cutting tools and tool holders
- Tool assemblies and fixture models
- Supplier details and inventory management
- ERP system support



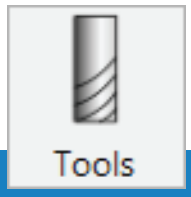
"Effortless Task Automation for CAM Programmers"
ToolManageriQ™ v4.0 eliminates the repetitive tasks that slow you down.
Instantly identify tools assigned to specific CNC machines
Know what's available and in stock at a glance
Say goodbye to endless searches through files, folders, and windows

Simplify your workflow and save valuable time with a solution built for efficiency.

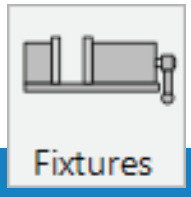
MULTIPLE LANGUAGES SUPPORTED
TMiQ makes it even better for everyone — Available in English, French, Swedish, Finnish, Czech, German, Spanish, and Japanese.

TMiQ

NATIVE IN GIBBSCAM 2025*
ToolManageriQ™ is available right from the GibbsCAM Commands Toolbar.



TOOL HANDLER
Flexible TDM includes tool holders and holder classes that apply to specific tool holders.



FIXTURE DATA
The TDM fixture data center, with editable fixture assembly input, allows for auto and manual customization.

SUPPLIER DATA
Manage tool inventory and supplier information locally.

*Multifunction indexable drill and intermediate tooling not supported yet.

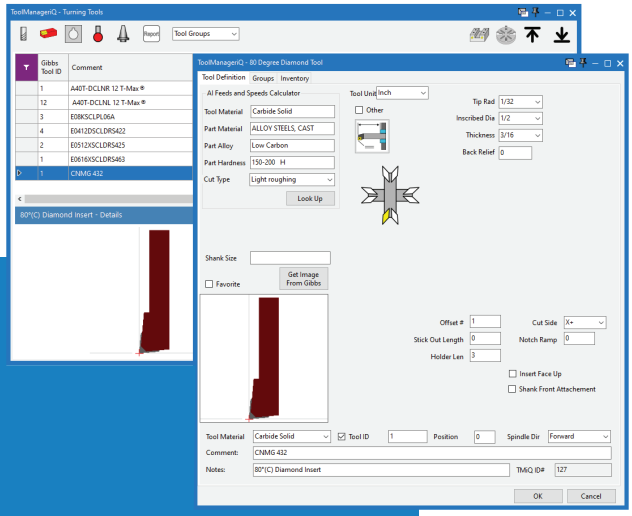
SUPPLY & DEMAND

Stay on top of supplier details and stay on-track with day-to-day demands of tool management.
Quickly replace and update your tool crib conveniently from a single location.

More information available at GibbsCAMTMiQ.com

Get all the details. And never skip a beat.

Know where your tools are



CENTRALIZED TOOL LIBRARY

Import and export tools, holders, and fixtures. TMiQ universally updates the entire TDM-SQL database.

CUSTOMIZED TOOL DATA

Add tools manually and still edit automated imports.

THE VIRTUAL TOOL CRIB

ToolManageriQ's ROI is immediate. Whether you manage hundreds or thousands of tools, your team can quickly and easily access any tool, get detailed information, including its location and supplier details. It's all captured right here, in TMiQ's virtual tool crib.

UNIVERSAL DATA CAPTURE

Team Members can update, add notes, or edit tool details as required, knowing the information is managed and shared in real-time and universally accessible.

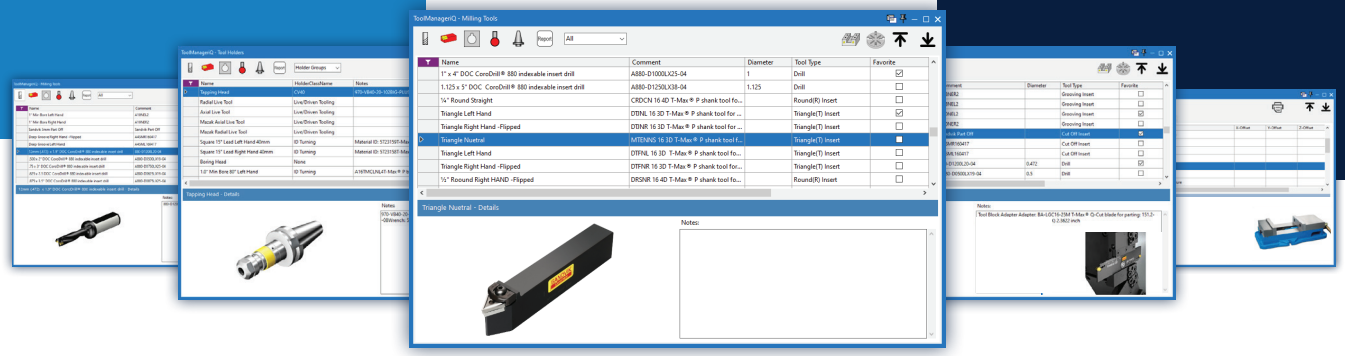
FREE 30 day trial

100+ PRE-LOADED TOOLS
Whether your team is using the stand-alone, or GibbsCAM version, they're ready to go. TMiQ supports better with over 100 preloaded tools, all of which encompass metric and imperial milling and turning tools.

ADDED BONUS
TMiQ is designed to make it even better – a sampling of fixtures and chucks are included.



ToolManageriQ™ now you're plugged-in

ToolManageriQ™ streamlined interactions...
Between our programmers and tool attendants saving us countless hours. With everyone working from one database we know exactly which tools, holders, and fixtures we have on hand and where to find them. Importing them into Gibbs with a few mouse clicks has reduced programming time as well. A must-have for any shop.

MEGATECH

ToolManageriQ™ is efficient and easy-to-use...
The software quickly became indispensable for the whole team in the workshop.
